

international international

One of the main drivers of Axéria Prévoyance's international growth has been APRIL, through which it has been able to take advantage of differences in maturity among insurance markets.

INTERNATIONAL GROWTH PRESENTS DUAL ADVANTAGES FOR AXÉRIA PRÉVOYANCE:

It enables:

- > to export its know-how in one or more links of the value chain to new markets (insurance, design, management, distribution),
- > to import innovative solutions to France by analysing structurally different markets.

AXÉRIA PRÉVOYANCE DELIVERS ITS OFFER:

- > individual protection,
 - > loan protection,
 - > health cover
- through foreign insurance companies' and brokers' networks.

The team is composed of actuaries and underwriters based in a number of different countries, so Axéria Prévoyance has a wealth of international data and tools at its disposal.

Insurance for incoming and outgoing expatriates is also a strong international growth area for Axéria Prévoyance.

At present, Axéria Prévoyance is established mainly in Europe and the Mediterranean area.

This presence is based on free provision of services, free establishment agreements or reinsurance deals.
